Education

K.S. Rangasamy College of Technology

2023 – 2027

B.Tech in Artificial Intelligence and Data Science, CGPA: 8.8/10

Tiruchengode, Tamil Nadu, India

- Relevant Courses: Data Structures & Algorithms, DBMS, Machine Learning, Web Development, Data Analytics

Reliance Matric Higher Secondary School

2022 – 2023

Class XII, Percentage: 81.7%

Namakkal, Tamil Nadu, India

Technical Skills

- **Programming Languages:** Python, Java, C
- **Frameworks & Web:** React.js, Node.js, Express.js, HTML5, REST APIs
- **Databases:** MongoDB, MySQL, Firebase
- **Data & Visualization:** Power BI, Tableau
- **Tools & Technologies:** Git, GitHub

Professional Experience

Web Developer Intern

Mar 2025 – May 2025

SkySphere Technologies

Sathiyamangalam, India

- Resolved 15+ bugs across client-facing React.js websites, fixing broken UI components and API integration errors that eliminated user-reported issues and achieved consistent cross-browser compatibility.
- Refactored repeated UI logic into 8+ reusable React components in collaboration with the dev team, accelerating the debugging workflow and saving 5+ hours per week in maintenance overhead.

Data Analytics Intern

Jan 2025

Code Core High Tech Solutions

Coimbatore, India

- Cleaned and preprocessed 5,000+ customer records using Python and Pandas, eliminating duplicate and null entries that raised marketing list accuracy by 20% and sharpened campaign targeting quality.
- Authored reusable data validation scripts in Python to detect schema violations and outliers across 10+ columns, cutting manual QA effort by 40%; presented findings to the analytics team to guide process changes.

Projects

Protein Bind Analysis with AI Chatbot | *Personal Project*

- Architected an AI-powered protein binding affinity prediction tool using Python and NVIDIA API, enabling researchers to process 500+ protein interactions weekly and cutting manual prediction time by 60%.
- Designed a natural language chatbot interface over the prediction engine so researchers could query binding results conversationally, reducing time-to-insight across drug discovery workflows.

Car Showroom Booking Web App | *Personal Project*

- Developed a full-stack booking platform using React.js and Firebase with integrated 3D torque simulation models, delivering real-time inventory updates and an interactive vehicle preview that drove a measurable lift in session time.

ARS Smart Tracker | *Personal Project*

- Built a full-stack productivity and developer-progress tracker (React, Node.js/Express, Firebase) unifying task management, analytics, and coding-platform integrations (GitHub, LeetCode) into a single dashboard.
- Implemented core features including drag-and-drop task management, streak/analytics tracking, an AI chatbot (Groq API), and an admin-mentee panel, while debugging real-world issues like timezone parsing and streak-logic errors.

Certifications

- NPTEL: Data Analytics with Python (Elite)
- NPTEL: Internet of Things (Elite + Silver)

Achievements

- Awarded 2nd Place at Kongu Engineering College inter-college Technical Project Presentation, leading the project demonstration and Q&A before a panel of faculty judges.
- Solved 400+ problems on LeetCode (leetcode.com), consistently practising DSA to strengthen algorithmic problem-solving.
