Career Objective

To leverage my knowledge in Artificial Intelligence & Data Science while enhancing my skills in Web Development and Data Analytics. Aspiring to become a Full-Stack Developer who contributes innovative solutions and builds impactful applications.

Educational Qualifications

- **K. S. Rangasamy College of Technology, Tiruchengode**

B.Tech in Artificial Intelligence and Data Science
CGPA: 8.8 (up to 5th Semester)

2023 – 2027

- **Reliance Matric Higher Secondary School Namakkal**

Percentage: 81.7% (12th Standard)

2022 - 2023

Projects

- **Protein Bind Analysis with Chatbot**

Expedited protein binding affinity predictions using the NVIDIA API, enabling high-throughput computation and visualization. Enabled researchers to analyze 500+ protein interactions weekly, accelerating drug discovery.

- **Car Showroom Bookings**

- Built a web application for torque-related simulations with **3D model integration**.

- Tech Stack: **React.js, Firebase, 3D Models**.

- **AI Roadmap Generator**

Integrated user goal data with a content database of 500+ learning resources, enabling AI tool to recommend relevant modules this personalization led to 30% faster roadmap creation.

Internship experience

- **Data Analytics Intern** – *Code Core High Tech Solutions, Coimbatore*

(06/01/2025 to 24/01/2025)

Conducted data cleaning and preprocessing on a dataset comprising 5,000 customer records, improving data quality and accuracy for subsequent analysis to improve marketing list quality by 20%.

- **Web Developer Intern** – *SkySphere Technologies, sathiyamangalam*

(10/03/2025 to 10/05/2025)

Fixed 15+ bugs in SkySphere Technologies' client project websites using React.js , improving code reliability and reducing user-reported issues; streamlined the debugging process, saving the team 5 hours per week.

Achievements

- **Project Presentation** : Awarded **2nd place** in a technical Project presentation at **Kongu Engineering College**.

- **Problem-Solving Skills**: Solved **250+ problems** on LeetCode, strengthening data structures and algorithm skills.

Skill Set

- **Programming**: C ,Java ,Python
- **Web Development**: Html & CSS , React.js, MongoDB, Firebase, MySQL
- **Data Visualization**: Power BI , Tableau
- **Soft Skills**: Problem-solving, Team Collaboration
- **Technologies**: Machine Learning, Artificial Intelligence
